Johnson Vincent

Cybersecurity | Cloud Security | Security Operations
CompTIA Security+ | Active Secret Clearance | U.S. Navy Veteran

Professional Summary

Cybersecurity professional and U.S. Navy veteran with 8+ years of experience supporting secure, mission-critical environments and compliance-driven operations. CompTIA Security+ certified with hands-on experience in network security, vulnerability assessment, system monitoring, and technical documentation. Currently pursuing a Bachelor of Science in Information & Cybersecurity Operations at ECPI University (Expected May 2026). Developing cloud security and infrastructure skills aligned with AWS environments including networking, system hardening, and monitoring.

WORK EXPERIENCE

Children's Hospital of The King's Daughters, Norfolk, VA
Security Officer II

04/2025 – Present

- Operate in a 24/7 security environment ensuring compliance with organizational safety and access control policies.
- Monitor facility systems and respond to security incidents involving personnel, safety, and access control.
- Document incidents and maintain detailed reports to support investigations and operational reviews.
- Support coordination with security teams and law enforcement when incidents occur.
- Maintain situational awareness across complex operational environments.

United States Navy, Norfolk, VA
Database & Systems Administration (NALCOMIS)

11/2015 – 01/2024

- Managed aviation maintenance databases and operational records supporting mission-critical aircraft readiness.
- Maintained and audited technical documentation using NALCOMIS systems ensuring data integrity and compliance.
- Administered access controls and safeguarded sensitive operational information.
- Supported system documentation and reporting within secure DoD environments.
- Identified discrepancies within documentation systems and implemented corrective actions.
- Maintained Active DoD Secret Security Clearance.

Cybersecurity Projects

- Network scanning and enumeration using Nmap.
- Packet analysis using Wireshark.
- Penetration testing labs using Metasploit.
- Python scripts including password checker and port scanner.
