PROFESSIONAL SUMMARY

Cybersecurity professional, U.S. Navy veteran, and CompTIA Security+ certified analyst with over 8 years of experience supporting secure Department of Defense operations and mission-critical systems. Experienced in access control, security compliance, incident response, risk management, technical documentation, and systems administration. Hands-on experience with vulnerability assessment, network analysis, digital forensics, malware analysis, and cloud security monitoring using Nmap, Wireshark, Metasploit, Linux, AWS, Azure, Python, and Splunk. Seeking Cybersecurity Analyst, SOC Analyst, Information Assurance Analyst, or Security Operations opportunities.

TECHNICAL SKILLS & QUALIFICATIONS:

- **Protocols & Networking:** TCP/IP, DNS, DHCP, LAN/WAN, Routing & Switching, Network Security, Packet Analysis
- **Security Tools:** Nmap, Wireshark, Metasploit, Tcpdump, Splunk, Microsoft Defender, YARA
- **Cloud & Security Operations:** AWS CloudWatch, Microsoft Azure, Security Monitoring, Incident Response, Risk Assessment, Access Control
- **Operating Systems:** Windows 10/11, Linux (Ubuntu), Unix Fundamentals
- **Programming & Scripting:** Python, Bash, PowerShell, SQL Fundamentals
- **Software:** Microsoft Office Suite (Word, Excel, PowerPoint, Outlook), GitHub, Visual Studio Code
- **Security Frameworks & Concepts:** NIST Cybersecurity Framework, Risk Management Framework (RMF), Vulnerability Management, Security Compliance, Information Assurance

CERTIFICATIONS

- CompTIA Security+ **May 2025**

PROJECT EXPERIENCE HIGHLIGHT

Cybersecurity Labs & Technical Projects, Virginia Beach, VA

November 2023 – May 2026

- Conducted network scanning, host discovery, and service enumeration using Nmap.
- Performed packet capture and traffic analysis using Wireshark to identify network activity and potential security threats.
- Completed penetration testing exercises using Metasploit to understand common attack techniques and vulnerabilities.
- Developed Python security tools to include password strength checkers, port scanners, and hash verification utilities.
- Performed digital forensics investigations by analyzing Linux logs, running processes, network connections, and system artifacts.
- Conducted malware analysis using hashing tools, strings analysis, tcpdump, and YARA techniques to identify indicators of compromise.
- Applied machine learning techniques including K-Means, DBSCAN, PCA, and Isolation Forest for network anomaly detection.

johnsonvincent.com | github.com/johvin4014 | linkedin.com

- Configured AWS CloudWatch monitoring and alerting to detect suspicious SSH login activity and security events.

National Cyber League (NCL) Competitions, Virginia Beach, VA

January 2026 – April 2026

- Participated in cybersecurity competitions focused on log analysis, vulnerability assessment, OSINT, web application security, cryptography, and incident response.
- Applied defensive and offensive security techniques in simulated real-world cyber scenarios.

EDUCATION

ECPI University – Virginia Beach, VA

October 2023 – June 2026

Bachelor of Science in Information & Cybersecurity Operations

Key Coursework:

- | | |
|--------------------------------------|---|
| • Digital Forensics | • Scripting |
| • Cloud Solutions | • Routing and Switching |
| • Networking | • Ethical Hacking |
| • Linux Administration | • Advanced Defense and Countermeasures |
| • Machine Learning for Cybersecurity | • Storage Area Networks and Disaster Recovery |

PROFESSIONAL EXPERIENCE

Children's Hospital of The King's Daughters (CHKD), Norfolk, VA

April 2025 – Present

Security Officer II

- Monitor and maintain security operations within a 24/7 healthcare environment serving patients, staff, and visitors.
- Respond to security incidents, emergency situations, and access control events while following established policies and procedures.
- Conduct routine patrols, risk assessments, and security checks to identify potential safety and security concerns.
- Document incidents, investigations, and operational activities through detailed reports and case documentation.
- Coordinate with hospital leadership, law enforcement, and emergency responders during incident response activities.
- Monitor surveillance systems, facility access controls, and security technologies to maintain situational awareness.
- Support regulatory compliance and enforcement of organizational security policies.
- Assist in maintaining a secure environment for sensitive areas, personnel, and critical healthcare operations.

United States Navy, Norfolk, VA

November 2015 – January 2024

Database & Systems Administrator (NALCOMIS)

- Administered mission-critical aviation maintenance databases supporting operational readiness for U.S. Navy aircraft operations.

Johnson M. Vincent

Cybersecurity Professional | CompTIA Security+ Certified | Secret Clearance | U.S. Navy Veteran

johnsonvincent.com | github.com/johvin4014 | linkedin.com

- Managed user accounts, permissions, and access controls within NALCOMIS systems to ensure secure access to operational data.
- Maintained, audited, and validated technical records and maintenance documentation to ensure data integrity and regulatory compliance.
- Conducted quality assurance reviews and system audits to identify discrepancies and implement corrective actions.
- Generated operational reports and analyzed maintenance data supporting leadership decision-making and mission readiness.
- Protected sensitive information and maintained compliance with Department of Defense security policies and procedures.
- Supported system troubleshooting, documentation management, and database administration functions in secure operational environments.
- Collaborated with maintenance control, quality assurance, and technical personnel to ensure accuracy of mission-critical information.
- Trained and mentored junior personnel on database management, documentation standards, compliance requirements, and operational procedures.
- Maintained eligibility for a Secret Security Clearance while supporting global military operations and deployments.
- Led and mentored 15+ personnel on database administration, compliance requirements, documentation standards, and operational procedures.
